## **Safety-Kleen and Mobius PRO Services Join Forces in New HSP Program**

Mobius PRO Services and Safety-Kleen Canada are pleased to announce they have reached an agreement that will see Safety-Kleen including its collection and recovery services into Mobius' Hazardous and Special Products (HSP) program.

“We are pleased to jointly make this announcement with Safety-Kleen as Mobius continues to make progress in offering choice and competition to producers looking to meet their obligations under Ontario's new Individual Producer Responsibility framework”, says Maury Shnier, Founder of Mobius PRO Services.

“As a long-established industry leader, Safety-Kleen welcomes the opportunity to participate in the development of a competitive market within which to offer our services and we look forward to continuing to offer choice and innovation in recycling these materials for our customers”, says Mark Pagnanelli, SVP Bulk Products and Services for Safety-Kleen Canada.

Under Ontario's HSP regulations, which take effect on October 1<sup>st</sup>, 2021, producers must demonstrate that they have collected and recovered their share of these end-of-life products and in so doing, achieved their regulatory obligation. The previous Ontario regulations, which expire September 30<sup>th</sup>, 2021, led to an establishment of a near-monopoly on the oversight and verification of these collection and recovery efforts, which left companies with no choice as to which organization they would work with to ensure they were meeting their recycling obligations.

As a Producer Responsibility Organization, Mobius PRO Services ensures that producers have met the requirements to establish and operate a collection network that complies with the new regulations, while validating that the collection and recovery activities that result achieve the quantities that its customers require.

Established in 2019, Mobius PRO Services is a multi-material Producer Responsibility Organization registered with Ontario's Resource Recovery and Productivity Authority (RPRA) with programs handling End-of-Life Tires, Electronics and now Hazardous & Special Products.

Safety-Kleen, a division of Clean Harbors Inc, is a leading North American provider of Environmental Services, Oil re-refining and responsible cleaning solutions.
